

EDWARDS LIFESCIENCES

Company overview

Edwards Lifesciences is the global leader in patient focused medical innovations for structural heart disease and critical care monitoring. Driven by a passion to help patients, the company collaborates with the world's leading clinicians and researchers to address unmet healthcare needs, working to improve patient outcomes and enhance lives. Headquartered in Irvine, Calif., Edwards' life saving innovations treat advanced cardiovascular disease and are sold in approximately 100 countries. Many of the company's products are considered industry standards and over 95 percent of its sales are from products in leading positions. Edwards has extensive manufacturing operations in North America, Europe, Singapore and the Caribbean.

Edwards' Irvine headquarters is home to the world's most advanced heart valve therapy manufacturing plant and the Museum of Heart Valve Design, the most prominent facility of its kind in the world.

The regional headquarter for EMEA, Latin America and Canada is based in Nyon (Switzerland).

Major product lines

Transcatheter Aortic Valve Replacement

Designed to treat heart valve disease using catheter-based approaches, Edwards' transcatheter aortic heart valve replacement technologies are used with certain patients for whom traditional open-heart surgery is not optimal.

Transcatheter Mitral and Tricuspid Therapies

Edwards is making significant investments in the development of therapy options designed to treat mitral and tricuspid valve diseases.

Surgical Structural Heart

Edwards is committed to being the partner of choice for cardiac surgeons and helping transform patients' lives by advancing surgical structural heart innovations. It is

the world's leading manufacturer of tissue heart valves and surgical heart valve repair therapies, which are used to treat a patient's diseased heart valve.

Critical Care

Edwards is a world leader in hemodynamic monitoring systems used to measure a patient's heart function and fluid status across care settings. Its complete hemodynamic portfolio helps clinicians make proactive clinical decisions and plays an important role in enhancing patient recovery.
